

The new Franke Largo LAX 110 45 & G-Clip

Press Release Date: 19th June 2009 (National Release)

The Institute of Kitchen, Bedroom & Bathroom Installers (iKBBI) is proud to be working with leading industry manufacturer, FRANKE, as the company launches the new Largo, accompanied by the revolutionary G-Clip.

Proving that big benefits can come in small packages, Franke has developed an exciting new sink that's ergonomically designed to maximise every millimetre of available space. The result is a surprisingly spacious bowl that fits into a smaller than average cabinet – making it perfect for the more bijou kitchen or those looking to maximise storage space. Part of Franke's high-end Specialist range of sinks and taps, the new Largo LAX 110 45 boasts ultra-modern looks and generous proportions, yet the bowl squeezes perfectly within a slender 500mm-wide base unit*.

Undermounted sinks are essential ingredients for achieving a sleek, streamlined kitchen design and are particularly stunning when combined with granite, wood and other solid surfaces. With its silky stainless steel finish, the new Largo LAX 110 45 is a great example of the undermounted look working its magic. Ensuring the surface area of the worktop is completely uninterrupted, the Largo LAX 110 45 is fitted from underneath using Franke's patented G-Clip fittings that provides an exceptionally close connection between sink and worktop. Franke's G-Clip fittings uses innovative technology which distributes weight from the sink bowl laterally, through the use of simple metal clamps that can be fitted in minutes and are strong enough to withstand more than 100kg.

Boasting a large single bowl, the Largo LAX is the perfect choice for those who wish to maximise space and can be used alone or in combination with a half bowl or another single bowl for more flexible use. The bowl measures 445mm wide x 390mm deep x 175mm high, which is ideal for large pots and pans, while its silk stainless steel finish is resistant to staining, chipping, rust and erosion and is also extremely easy to keep clean.

As part of the Specialist range of sinks, the Largo LAX 110 45 is designed with cutting-edge style in mind, and is constructed from premium grade materials. Complementary accessories, specifically designed to fit the Largo LAX 110 45's dimensions, can be bought separately and include a drainer basket as well as the extremely useful Franke Rollamat. This flexible little helper provides the perfect draining surface as well as an ideal surface to defrost food items and place heavy objects and hot pans, and can be easily rolled up and stored away when not in use.

The Largo LAX 110 45 retails at £199.55 including VAT.
